HORIZONTAL SHOWCASES

CIAM

Refrigeration solutions
with a design focus.

6040

A new concept of
technological essentiality

Pasticceria Varriale - Naples

The 6040 showcases series consists of refrigerated, heated or ambient modular showcases available in 4 depths (625, 800, 1000, 110) and 16 types of glass gantries. The 6040 showcase is characterized by a small difference in height between the work surface and the display area, which is always coplanar even in the case of display cases joined together. The minimalist style of 6040 allows designers to easily insert this type of showcase in any design and stylistic context.

Versatility and technology serving any business need

Dupont avec un thé - Neuilly-sur-Seine

Petrossian - Issy-les-Moulineaux

The 6040 models can satisfy any business need. They are perfect for preserving and displaying: fresh pastry, monoportions, macarons, chocolate, ice-cream, ice-cream cakes, butchery products, cold and hot deli products, brioches, pizza, bread, fish.

Sleek and modern design for superb refrigeration solutions

Pasticceria Cova - Atene

Pandolci - Manduria

Wide selection of materials

Design

Materials

All visible components can be customized by using Ciam's selection of Materials, which includes a wide variety of gres, acrylics, engineered stones, natural stones, epoxy powder-coated sheets, sheets with electroplating treatment, brass, and wood.

Micro-perforated sheet

The air supply and intake are characterized by an elegant micro-perforated geometry.

Digital display

The temperature display is digital, flush with the top.

Micro-perforated sheet

Digital display

Customization

Wide range

The 6040 display case range has 12 lengths (from 900 to 3000 mm), 2 types of 90° open corners (squared and curved) and 1 45° (curved), 4 depths (625, 800, 1000, 1100 mm).

Channeling

6040 display cases can be perfectly channeled in aesthetic continuity regardless of the type of system (ice cream, pastry, deli, etc...).

Types of set-up

6040 showcases can be supplied in the following set-ups:

Paneled

A solid or painted HPL paneling is supplied upon request along with the display case.

Semi-finished set-up

The display case is without paneling, this one will be provided by the interior designers.

Drop-In

the showcases is supplied in drop-in version, in order to be embedded in an existing counter.

Paneled set-up

Drop-in set-up

Semi-finished set-up

Glass gantries

The wide range of 6040 display cases is completed with the possibility of combining as many as 16 types of glass gantries available in multiple heights.

Matching hardware

The profiles and hardware are designed with a unique, minimalist style, most are made of steel with micro-cast molds, the standard finish is polished, but epoxy powder coating or galvanic treatment is available upon request.

Adjustable shelves

Intermediate glass shelves, where provided, have integrated micro-lighting fixture. The system of adjustment in both height and depth is done by means of low-voltage electrified racks, which avoid the use of electric cables.

Adjustable shelves on low-voltage electrified rack

TS

h1200 mm

UV glued glass, heated glass sides, bright aluminum LED light fixture. PETG easy sliding doors system, anti-fog front air baffle.

h1350 mm

UV glued glass, heated glass sides, bright aluminum LED light fixture and adjustable intermediate glass shelf on low-voltage bright aluminum electrified rack. PETG easy sliding doors system, anti-fog air baffle.

Heated glass sides, bright aluminum LED light fixture, anti-fog
front air baffle.

Bright aluminum LED light fixture.

Thermodynamics

6040 showcases provide superlative performance thanks to a ventilated refrigerated system with an oversized evaporator that ensures very high internal humidity perfect for displaying and storing quality artisan products.

Single air-flow

R290 built-in condensing unit

All built-in condensing units are hermetic and use the eco-friendly gas R290, which ensures minimal environmental impact and significant energy savings.

NoFog

The perfect transparency and lightness of the showcase is the basis of a quality display, which is why CIAM has patented an innovative anti-fog system that involves the use of 8mm-thick pyrolytic glass with low-voltage electrical resistances, so the effect of a classic glass showcase is achieved even with the use of heated glass.

R290 built-in condensing unit

NoFog technology

Gelato showcase with single air-flow

Gelato showcase with single air-flow

P1000 gelato display cabinets can be supplied with single- air flow, which allows for the insertion of storage ice cream pans.

Gelato showcase with double air-flow

P1000 gelato display cabinets can be supplied with double air flow, which ensures perfect temperature equalization on all ice cream pans.

Gelato showcase with lowered side arrangement

All gelato showcases can be supplied in the version with a lowered side panel that ensures perfect channeling in aesthetic continuity with the pastry models.

Gelato showcase with double air-flow

Gelato showcase with lowered side arrangement

Combi

Model 6040 is also available in a Combi version, which is ideal for expanding sales offerings. This version combines a refrigerated self-service compartment with a glazed one for assisted sales.

MULTIX

50 kWh

Energy saving showcase
per linear meter

40%

Energy saving compared
to traditional systems

MULTIX technology can be applied to the showcases 6040 and it allows to adjust temperature and humidity through a simple and intuitive electronic touch screen panel according to the customer needs (patented system). Thanks to the inverter technology and to the control Software with Technology by Gelsystem it is possible to have the highest efficiency and the highest performance on the product because the curve of the temperature and especially that of the humidity is constant and it is not stressed by sudden fluctuations as there are no electrical resistances; in fact the heat is generated via hot gas injections. The inverter technology also guarantees great energy and economical savings.

The new smart refrigeration system

Through a touch screen panel it is possible to choose up to four different preset programs or to adjust temperature and humidity according to the customer needs.

Multix gets the advantages of the inverter technology and hot gas injections to control humidity, without electric resistances.

LED light fixture

Lighting

Lighting with 3000°K diffused LEDs is perfect for enhancing the products displayed in our showcases. The LED strips are integrated in unique aluminum light fixture, both in the ceiling and fixed shelf versions and in the innovative version integrated with the height- and depth-adjustable shelf on a low-voltage electrified rod.

Features

QR code

In the technical compartment there is a product label with a QR code from which user and maintenance manuals and other technical content related to the product can be downloaded.

Liftable evaporator unit

The evaporator unit can be supplied in the power-assisted lift-up version, this facilitates cleaning of the tank bottom.

Product label with QR code

Liftable evaporator unit

Ciam Connect System

Electronics

CIAM CONNECT

Ciam Connect is the integrated solution for remotely monitoring and managing all functions of CIAM products.

All features can be activated and monitored from a simple smartphone, tablet, or PC.

It is also possible to integrate the solution directly into your company's management system.

Connectivity

This SIM data communication device allows remote control of the showcase without having to connect it to Wi-Fi or the local internet network.

Remote control

Through the Cloud portal you can interact with the showcase, by downloading the operating graphics, monitoring alarms and product performance directly online.

Key features

1. Customization of panels, finishes and internal materials.
2. Customization of dimensions on specific requests.
3. Possibility to have two or more showcases joined together with the same aesthetics.
4. Eco-friendly gas R290 for built-in condensing units.
5. Wide range: 12 linear models, 3 corner models, 4 depths (625, 800, 1000, 1100), as many as 16 types of glass gantries, 11 types of technological systems.
6. High humidity that enhances the perfect product preservation.
7. Adjustable shelves in height and depth on low voltage electrified rack. In this way it is possible to customize the display of the showcase without electric cables.
8. Sliding doors with hermetic perimeter seals on operator side that guarantee a hermetic closing of the refrigerated compartment.
9. ETL certification available for all the models (Canadian and north American markets).

Optional

Compatibility with tube/white (patented system) for constant sanitation of internal surfaces

Compatibility with MULTIX (patented system)

Anti-fog system for glasses (patented system)

Magnetic filter for an easy cleaning of the condenser

Remote control system for the constant monitoring of the showcase proper functioning

Showcases at positive temperature can be converted to be used for pralines.

Showcases at low temperature can be converted into positive temperature

Wheels kit

Liftable evaporator unit with gas pistons for a perfect cleaning of the tank

Possibility to add a storage module
