

GRAB&GO CLASSIC

VERTICAL SHOWCASES

CIAM

Refrigeration solutions
with a design focus.

Grab&Go Classic

Design and versatility for vertical display.

Refrigerated wall cabinets at positive, low or hot temperature. The tanks are monolithic and available in the following standard lengths: 600, 1000, 1200, 1500, 1800, 2400 (plus sides dimension). Refrigeration is ventilated through a cooling system from below. Open is the standard version, provided with roller blind in micro-fabric. Eco, Premium or Slide doors can be provided as an extra option. Standard sides are in double-glazed glass. The shelves can be adjusted in height and are made in bent steel with integrated lighting profile. The standard finish of the internal and external sheets is matt black epoxy powder coated steel (RAL 7021), other finishes can be supplied as an extra options. Grab&Go Grab&Go Classic cabinets are supplied with 3000°K diffused LED.

Grab&Go Grab&Go Classic wall cabinets P70 L1800 + 1800 Open version with glass divider and solid sides | interior and exterior epoxy powder-coated RAL7021 matt black

A uniform and unlimited display continuity.

Composition Grab&Go Classic P90 L2400 with Eco doors + Grab&Go Classic P70 L1800+1800 Open version+ Grab&Go Classic Hot L1200 | Glass sides and glass dividers | interior epoxy powder-coated RAL7021 matt black | exterior epoxy powder-coated RAL1038 | remote compressor

GDO

Grab&Go Classic P90 TP with Eco doors, epoxy powder-coated RAL7021 interior and exterior; connection to central cooling system.

Grab&Go Classic P70 BT with Premium doors, exterior white finish RAL9001, interior epoxy powder coated RAL9001; connection to central cooling system.

Grab&Go Classic P70 TP L1200+1200 Open version with built-in condensing unit channeled with Grab&Go Classic L1200 P70 HOT; interior and exterior epoxy powder-coated Matt Black RAL7021, mirror intermediate dividers, solid sides.

Grab&Go Classic P70 TP with Slide doors, interior and exterior epoxy powder coated RAL9001; oak shelves, charcuterie hooks, remote condensing unit.

Refrigeration

Refrigeration from below

Grab&Go Classic wall cabinets have the refrigeration coil located in the lower tank. Through fan ventilated refrigeration system, the cold reaches all display shelves uniformly.

Positive and low temperature refrigeration

The Grab&Go Classic P70 wall cabinets are available in both positive and low temperature, in the low case the Premium triple-glazed doors are supplied.

Automatic electric defrosting

The defrosting of the refrigerating coil is carried out with electric resistances to speed up the defrosting time and prevent the formation of ice.

Reverse cycle defrosting

All low-temperature models have ultra-rapid reverse cycle defrosting as standard, the compressor is always external.

Refrigeration from below

Positive and low temperature refrigeration, Premium door setup.

Cataphoretically treated evaporator

All cooling systems are cataphoretically treated and guarantee maximum hygiene as the copper tubes and aluminium fins have no rough surfaces.

Condensate evaporator pan

All Grab&Go Classic cabinets can be equipped with a condensate evaporator pan with electric resistances if it is not possible to connect the water drainage system to the room drainage system.

Electronic thermostatic valve

Grab&Go Classic wall cabinets have an electronic valve as standard, but it is possible to fit it as an extra option, especially in the case of connections to cooling system.

White Tube sanitisation system

Upon request, it is possible to apply the Tube constant sanitisation system, which allows 99% of viruses, bacteria and mould to be eliminated inside the refrigerated compartment.

White Tube, UV sanitisation system

Standard touch control unit

Electrical components box

Touch panel

The elegant touch control panel is fitted as standard on all refrigerated modules.

Ciam Touch Pro panel

Upon request, it is possible to equip Grab&Go Classic models with the Touch Pro control panel for professional use that allows you to take full advantage of the refrigerator's performance.

Electrical components box

The electrical system is contained in a hermetically sealed box with quick connectors, simplifying installation and maintenance.

Lighting

Light is fundamental for a correct spectacular display of the products, which is why Ciam has chosen to install an elegant indirect lighting system with 3000°K diffused LED..

Dimmer to adjust the intensity of the lighting (Options).

Electronic low consumption fans

Grab&Go Classic refrigerated cabinets are equipped with low consumption electronic fans.

CIAM CONNECT

1. Connectivity

The device allows remote control of the showcase thanks to connectivity with a Sim card that does not require wi-fi or a connection to the premises data.

2. Remote control

Through the Cloud portal you can interact with the showcase, by downloading the operating graphics, monitoring alarms and product performance directly online

Ciam Connect

Ciam Touch Pro panel

Lighting

Mechanical lock

Eco doors

Open version

Open wall cabinet with roll-down night curtain in dark micro-fabric.

Eco Doors

Double-glazed doors with black screen printing and black PVC perimeter frame.

Premium triple-glazed doors

Triple-glazed glass with matt black screen printing, door opening without mullion, frame and handle epoxy powder coated RAL7021.

Mechanical lock

A lock with a key can be installed on request.

Triple-glazed Premium doors, heated and Anti-Fog.
Removable magnetic gasket

Open Version

Heated glasses

Positive-temperature modules can be equipped with heated low-temperature glazing, while low-temperature models have heated glazing as standard.

Anti-fog film

All doors are supplied with an anti-fog film as standard. This prevents the inner surface of the double-glazed glass from fogging up when the door is opened

Removable magnetic gasket

All doors are equipped with removable magnetic gaskets that ensure that the refrigerated compartment is sealed.

Slide Doors

Double-glazed sliding doors on an aluminium track and magnetic stop, frame and handle epoxy powder coated RAL7021.

Slide Doors

Customised dimensions upon request

Standard shelves

Standard

Bent steel shelf; standard powder-coated s/s shelf with RAL7021 matt black finish, option finishes: epoxy powder coating, electroplating.

Customisation of colours, materials and finishes

The standard finish of the internal sheets is RAL 7021 matt black powder-coating. On request, it is possible to choose other RAL colours.

Custom dimensions on request

On request CIAM can customise the dimensions of Grab&Go Classic wall cabinets (Option).

Monolithic tank

The entire structure of Grab&Go Classic wall cabinets is monolithic, coated in AISI 304 s/s and heat-insulated with ecological polyurethane.

Glass sides

Instead of a solid side, it is possible to install a double-glazed side.

Channelling modules in continuity

All Grab&Go Classic cabinets can be channelled to achieve aesthetic continuity.

Glass sides

Module channelling continuity

Shelf_T8

Hook for hanging charcuterie; standard finish satin-finished steel, option finishes: epoxy powder coating, electroplating.

Shelf_T7

Shelf in solid natural oak; option finishes: solid wood on request.

GRAB&GO CLASSIC P70

Refrigerated wall cabinet at positive temperature (+4°C) with depth 700 mm | moulded heat-insulated tank made of ecological polyurethane coated with AISI 304 s/s | fan ventilated refrigeration system on all display levels | automatic defrost | version with remote or built-in hermetic condensing unit | digital control panel | double-glazed glass sides and black screen printing | Open version with roller blind in micro - fabric | back in polished s/s | bent steel shelves in polished finish and adjustable on rack rod | lighting on all shelves with 3000°K diffused LED | base of counter in s/s | s/s feet adjustable in height
